OBJECTIVES

An e-commerce site connected to SAP  
with rich editorial content,  
managing multiple countries and languages,  
where each country is independent,  
where the content must be validated by France

except some...

Fluid front-end, that must work with IE6...

SOME NUMBERS

2 ERP, INCLUDING SAP

16 COUNTRIES, INCLUDING CHINA

8 LANGUAGES,  
INCLUDING JAPANESE

2,500 PRODUCT REFERENCES

15,000 MAN HOURS

12 MONTHS OF DEVELOPMENT

15 PEOPLE

70 TEMPLATES 57 CONTENT TYPES

# BASIC TECHNIQUES

# Drupal™

**DRUPAL COMMERCE**

# Strategic choices

A single **Drupal** instance for all the sites.

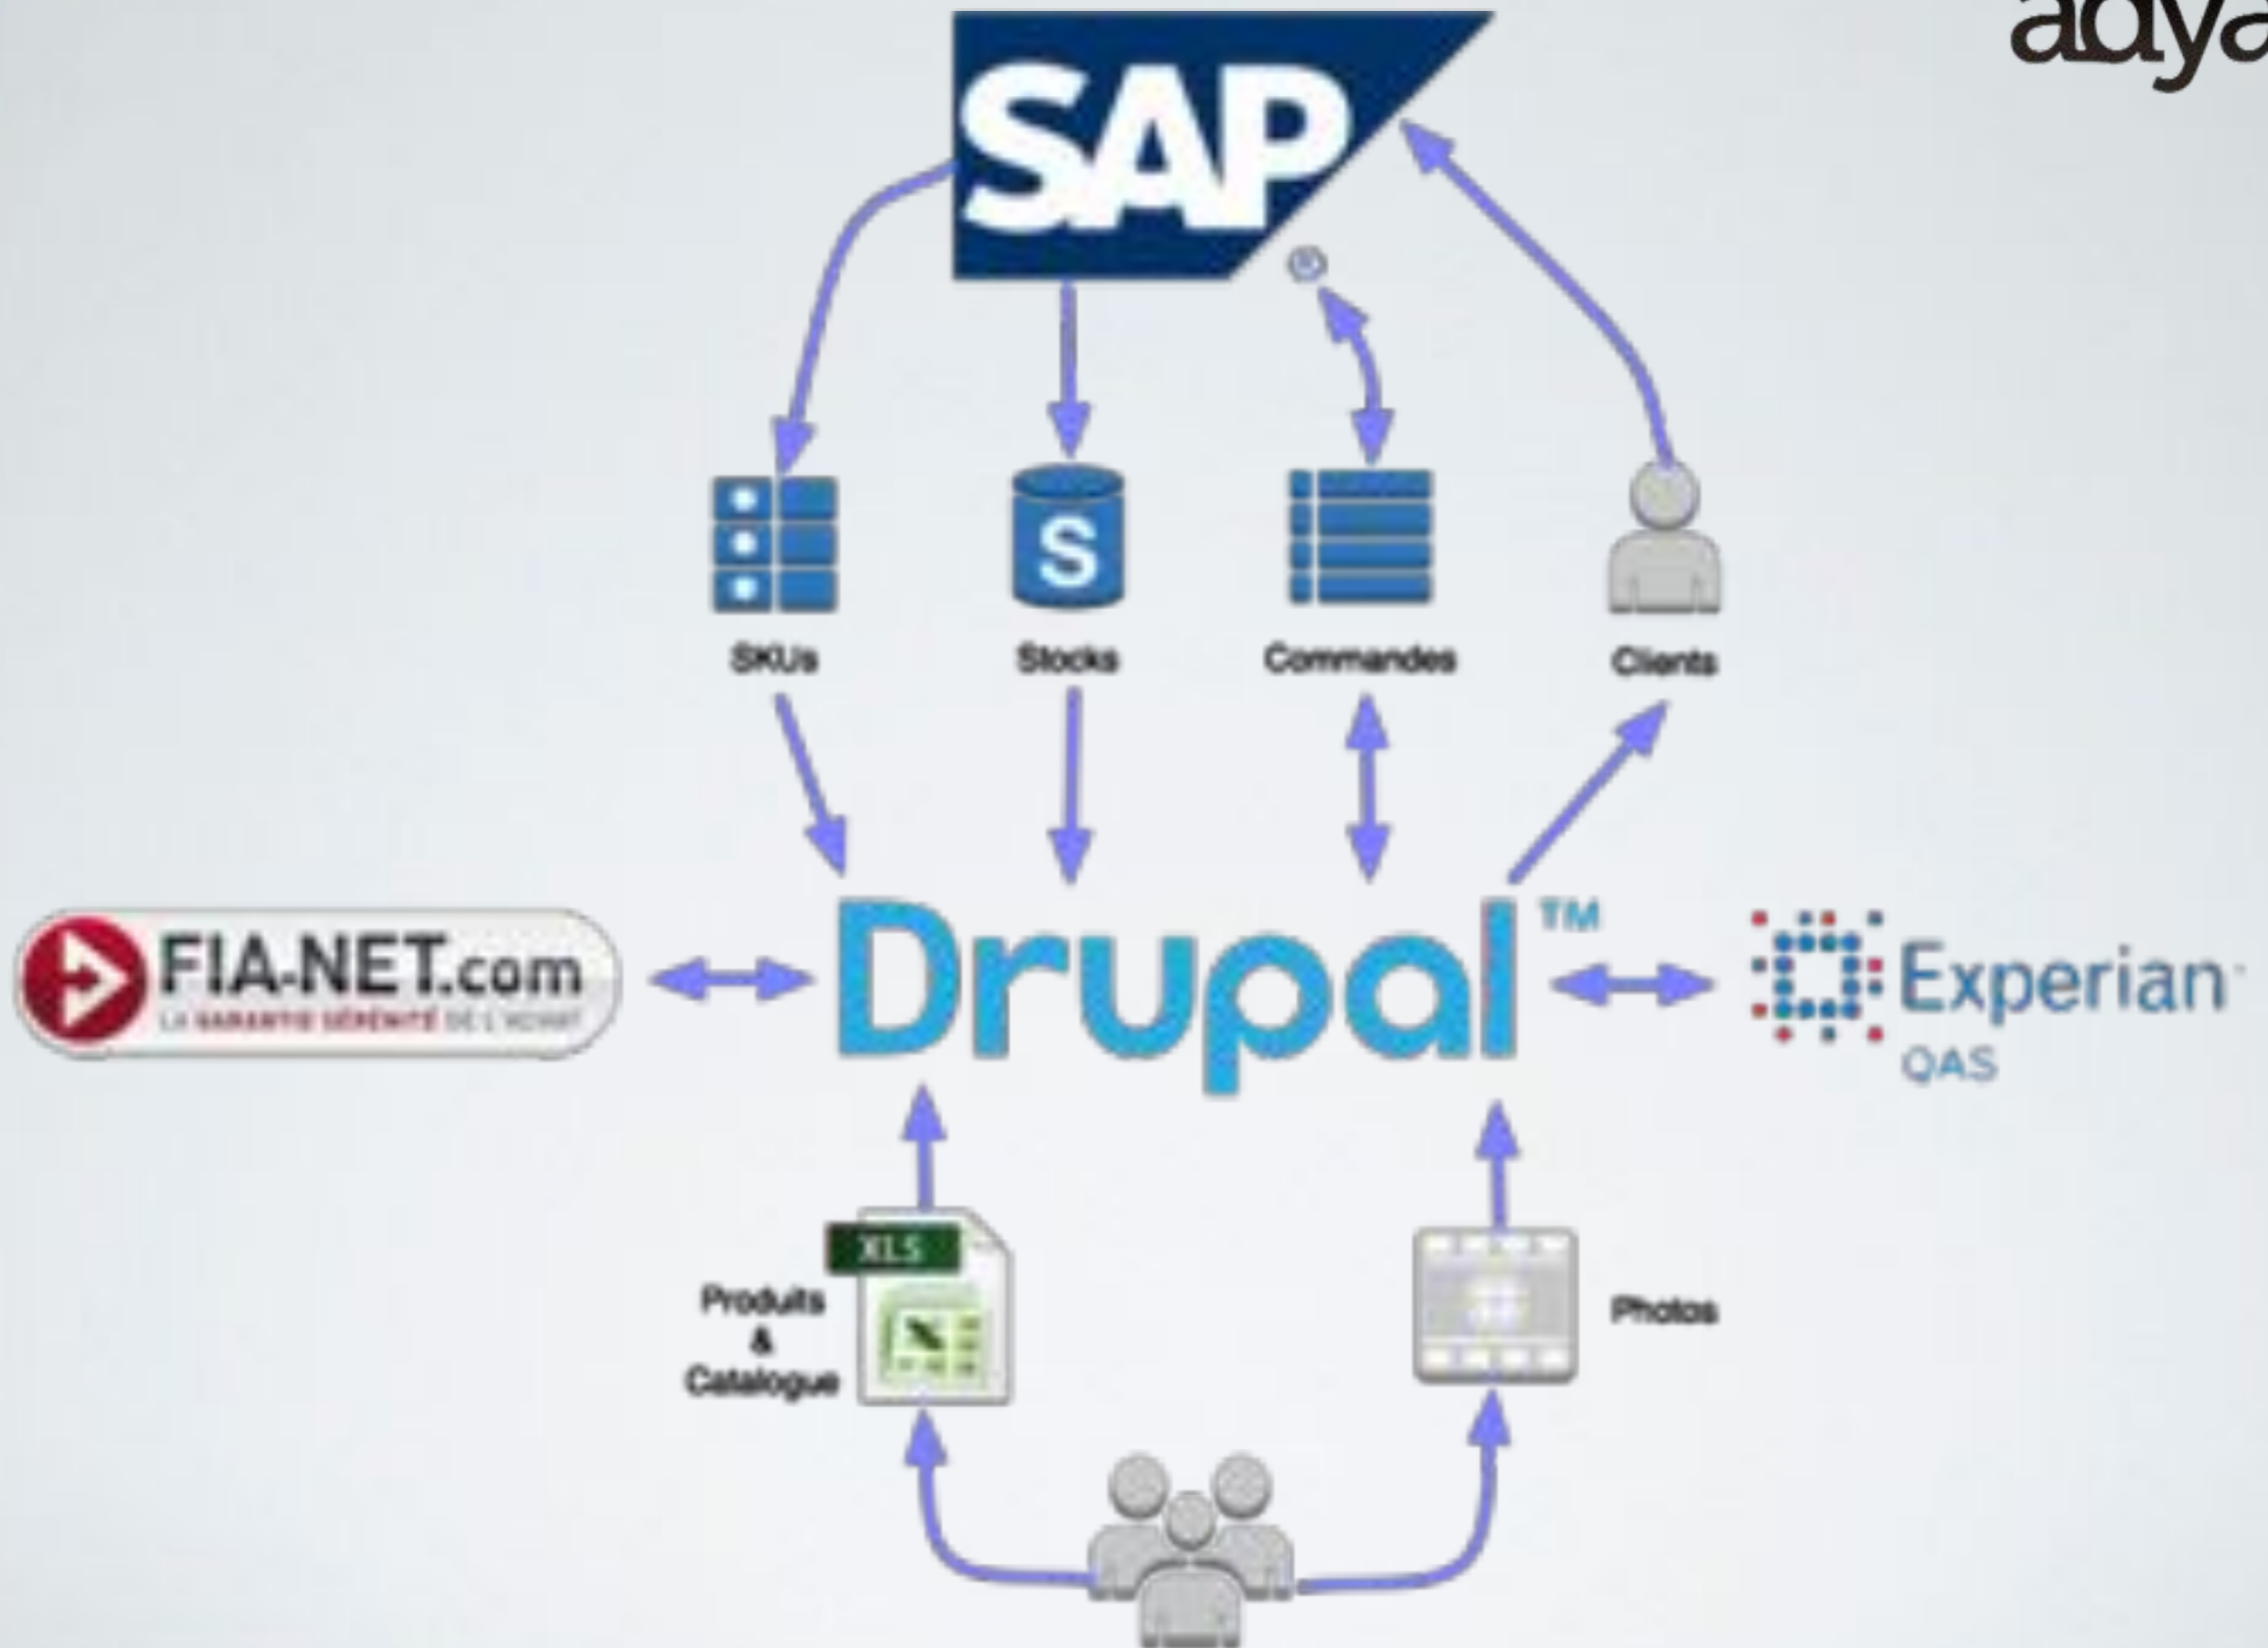

Site launch is **progressive**, country by country.

**Export** and **import** of content via **Excel**.

Certain sites will be **e-commerce**, others **won't**.

No **Flash**, in spite of luxurious environment.

# COUNTRIES & LANGUAGES

Germany	ge	German	de

Management of **languages** based on several very standard **Drupal** modules:

Localization Client (**l10n\_client**)

Translation Template Extractor (**potx**)

Entity Translation (**entity\_translation**)

## Translate interface

[Overview](#)
[Translate](#)

This page provides an overview of available translatable strings. Drupal displays translatable strings in text groups; modules may define additional text groups. Because text groups provide a method of grouping related strings, they are often used to focus translation efforts on specific areas of the Drupal interface. See the [Languages page](#) for more information on adding support for additional languages.

Language	Built-in interface
Chinese, Traditional	64/15591 (0.41%)
Czech	5936/15591 (38.07%)
Dutch	163/15591 (1.05%)
English	11/15591 (0.07%)
French	10523/15591 (67.49%)
German	8351/15591 (53.56%)
Greek	5191/15591 (33.29%)
Italian	166/15591 (1.06%)
Korean	5271/15591 (33.81%)
English (built-in)	n/a
Polish	9424/15591 (60.45%)
Russian	9218/15591 (59.12%)
Spanish	147/15591 (0.94%)
Ukrainian	6121/15591 (39.26%)

Each **country** can be identified either by its **domain** (guerlain.co.uk), or by a **URL key** (guerlain.com/fr)

The Domain Access module (**domain**) offers this feature on a platter.

HOME ADMINISTRATION STRUCTURE **DOMAINS** My account Log out

# GUERLAIN

Axes Categories Filters Grouping Products SKU Dossier News

 **Domains** [+ Create domain](#)

The following domains have been created for your site. The currently active domain is shown in **boldface**. You may click on a domain to change the currently active domain. Your default domain is `dev.guerlain.adyax.com`, which will be used for all requests that fail to resolve to a registered domain.

Order	Name	Domain	Id	Active	Default	Operations
+	<b>Central</b>	<b>dev.guerlain.adyax.com</b>	1	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<a href="#">edit domain</a>
+	English not e-commerce not showing price	en.dev.guerlain.adyax.com	10	<input checked="" type="checkbox"/>	<input type="radio"/>	<a href="#">edit domain</a>
+	France not e-commerce show price	fr.dev.guerlain.adyax.com	11	<input checked="" type="checkbox"/>	<input type="radio"/>	<a href="#">edit domain</a>

Homepage copying

Catalog structure configuration, product displays copying

Magazine dossiers displays copying

Menu, articles, consultations, social network configurations, ...

Three features were essential:

1

A 'central' country where all original content is first created

2

Possibility of copying all at once all content of one language to another

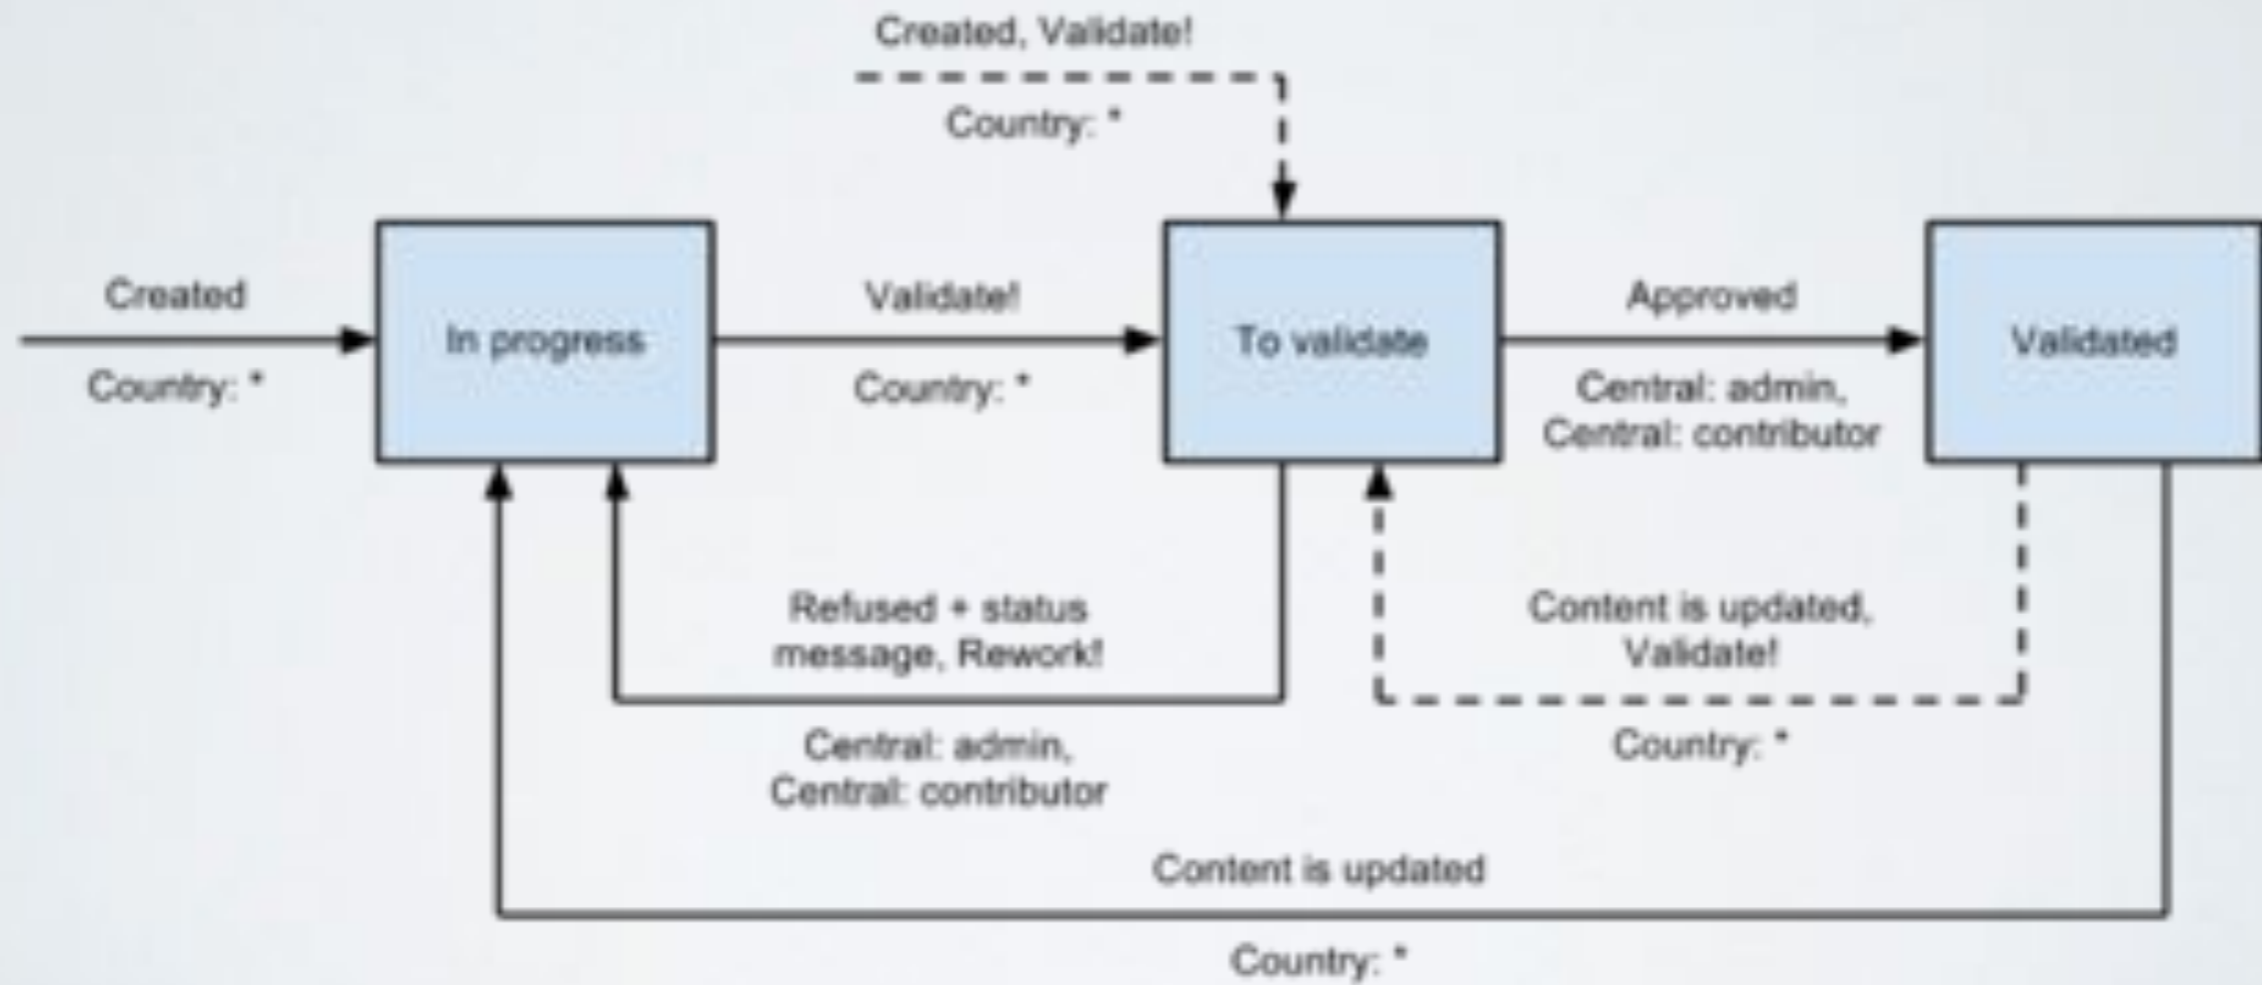

3

Notification of countries in case of modification of any content in the 'central' country

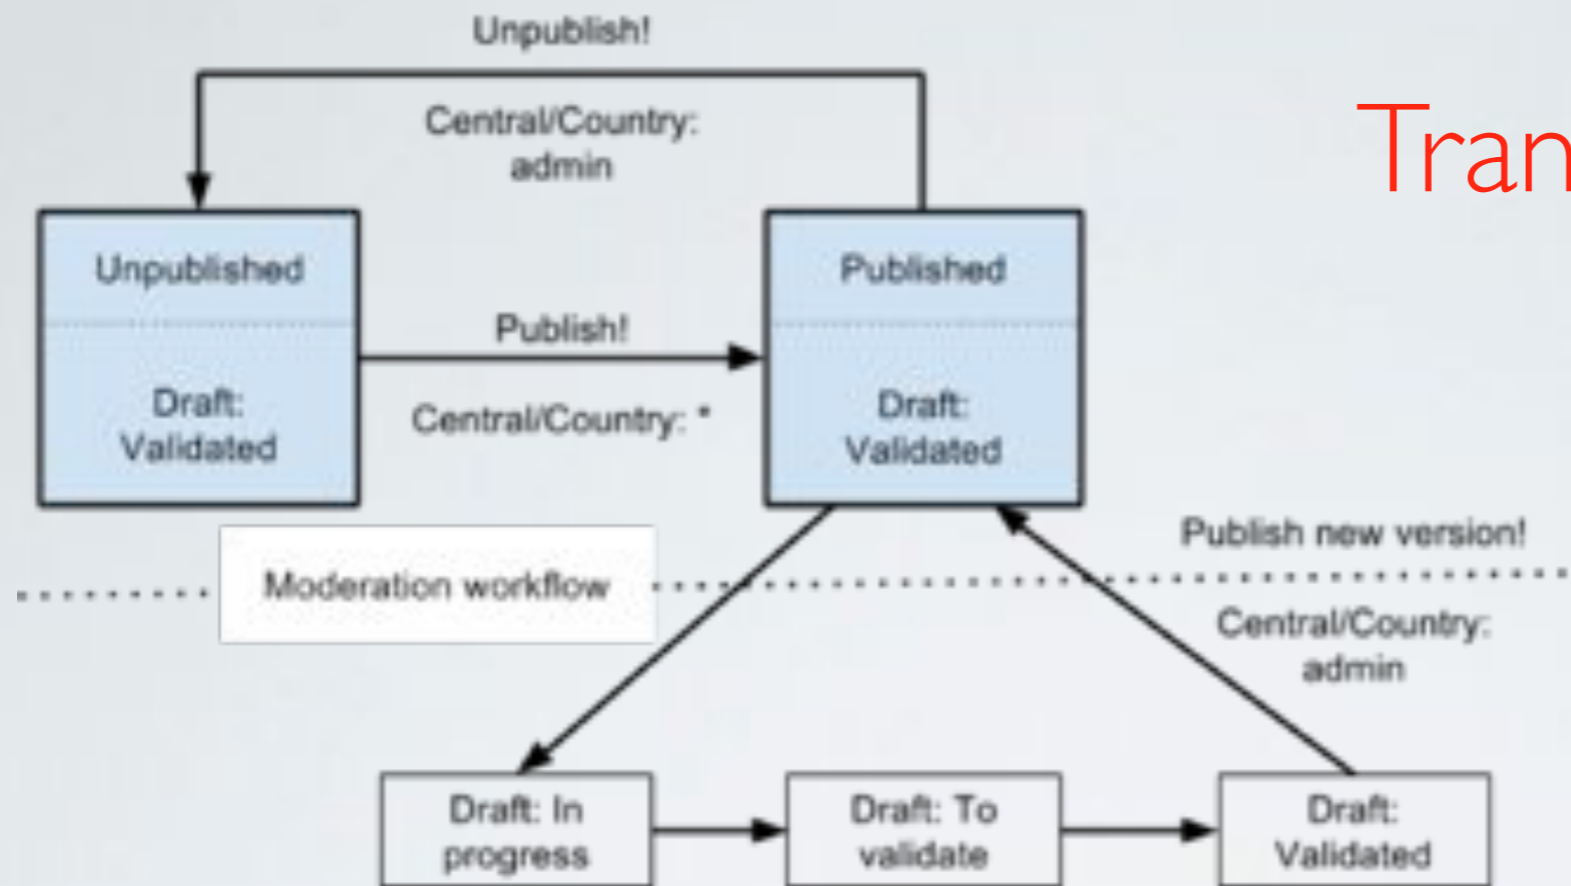

No workflow for the primary contents (editorial, products). The countries are responsible and have two versions at their disposal (draft & published)

A real workflow for the home pages

# Content workflow

# Translation workflow

When we say “content translation gets published”, it means:

- Original language / Central: content is available for the Countries' local translations;
- Country local languages: content translation is available online for the website users.

Specific problem: customization of forms  
(inscription, newsletter) according to countries.

## Configuration

Field name	Visible	Required	Info tooltip	Options	
+ Civilité	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		Mme, Mr.	
+ Prénom	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		
+ Nom	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		
+ Date of birth	<input checked="" type="checkbox"/>	<input type="checkbox"/>		DD/MM/YYYY	
+ Email	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
+ Mot de passe	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
+ Téléphone	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Minimal: 5, maximal: 12	
+ Cell number	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Minimal: 8, maximal: 12	
+ Membership code	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
+ Billing Address	<input checked="" type="checkbox"/>	<input type="checkbox"/>			
+ Veuillez cocher cette case si vous souhaitez recevoir la Newsletter de Guerlain.	<input checked="" type="checkbox"/>	<input type="checkbox"/>			
+ Privacy policy 2	<input type="checkbox"/>	<input type="checkbox"/>		No link to static page.	
+ Privacy policy 1	<input type="checkbox"/>	<input type="checkbox"/>		Link: node/14069	
+ Veuillez cocher cette case si vous souhaitez recevoir la Newsletter de Guerlain.	<input type="checkbox"/>	<input type="checkbox"/>			
+ Mobile mail address	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

Take-home message:

Building the best possible, scalable multilanguage-multicountry perfect solution, with overrides, notifications, permissions and complex workflow is **NOT WORKING**.

Client wants less features and a simple workflow, even if it requires more manual work from their contributors.

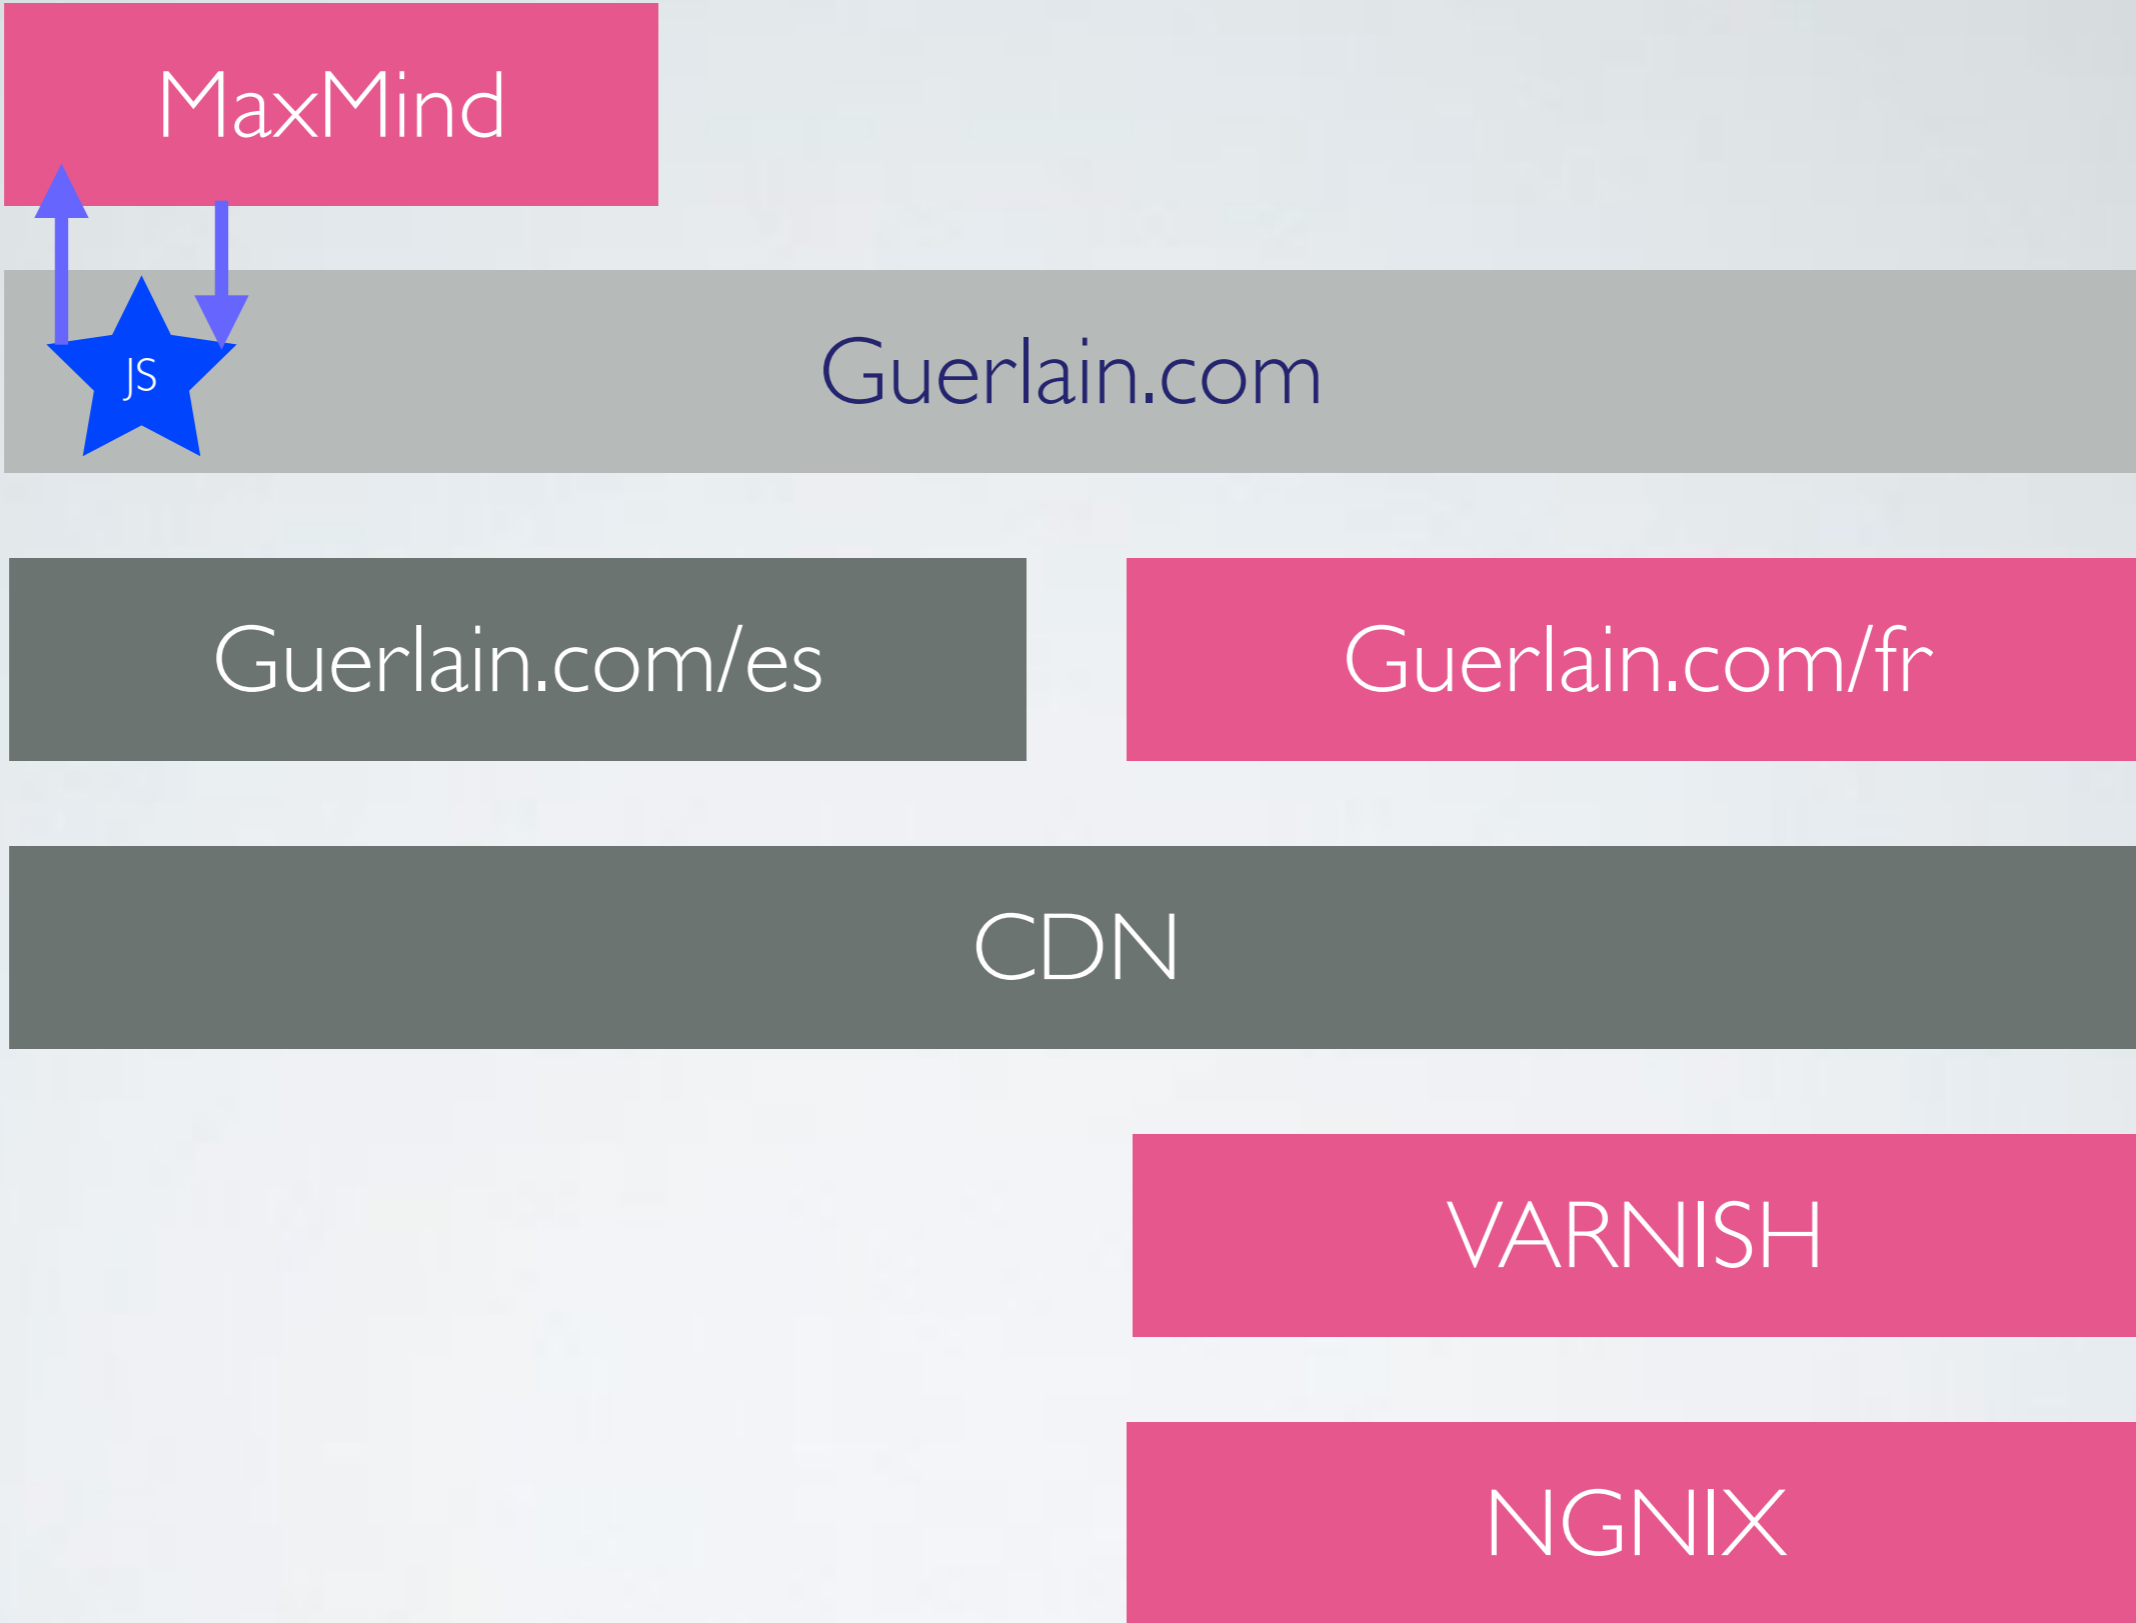

## Entity translations vs i18n

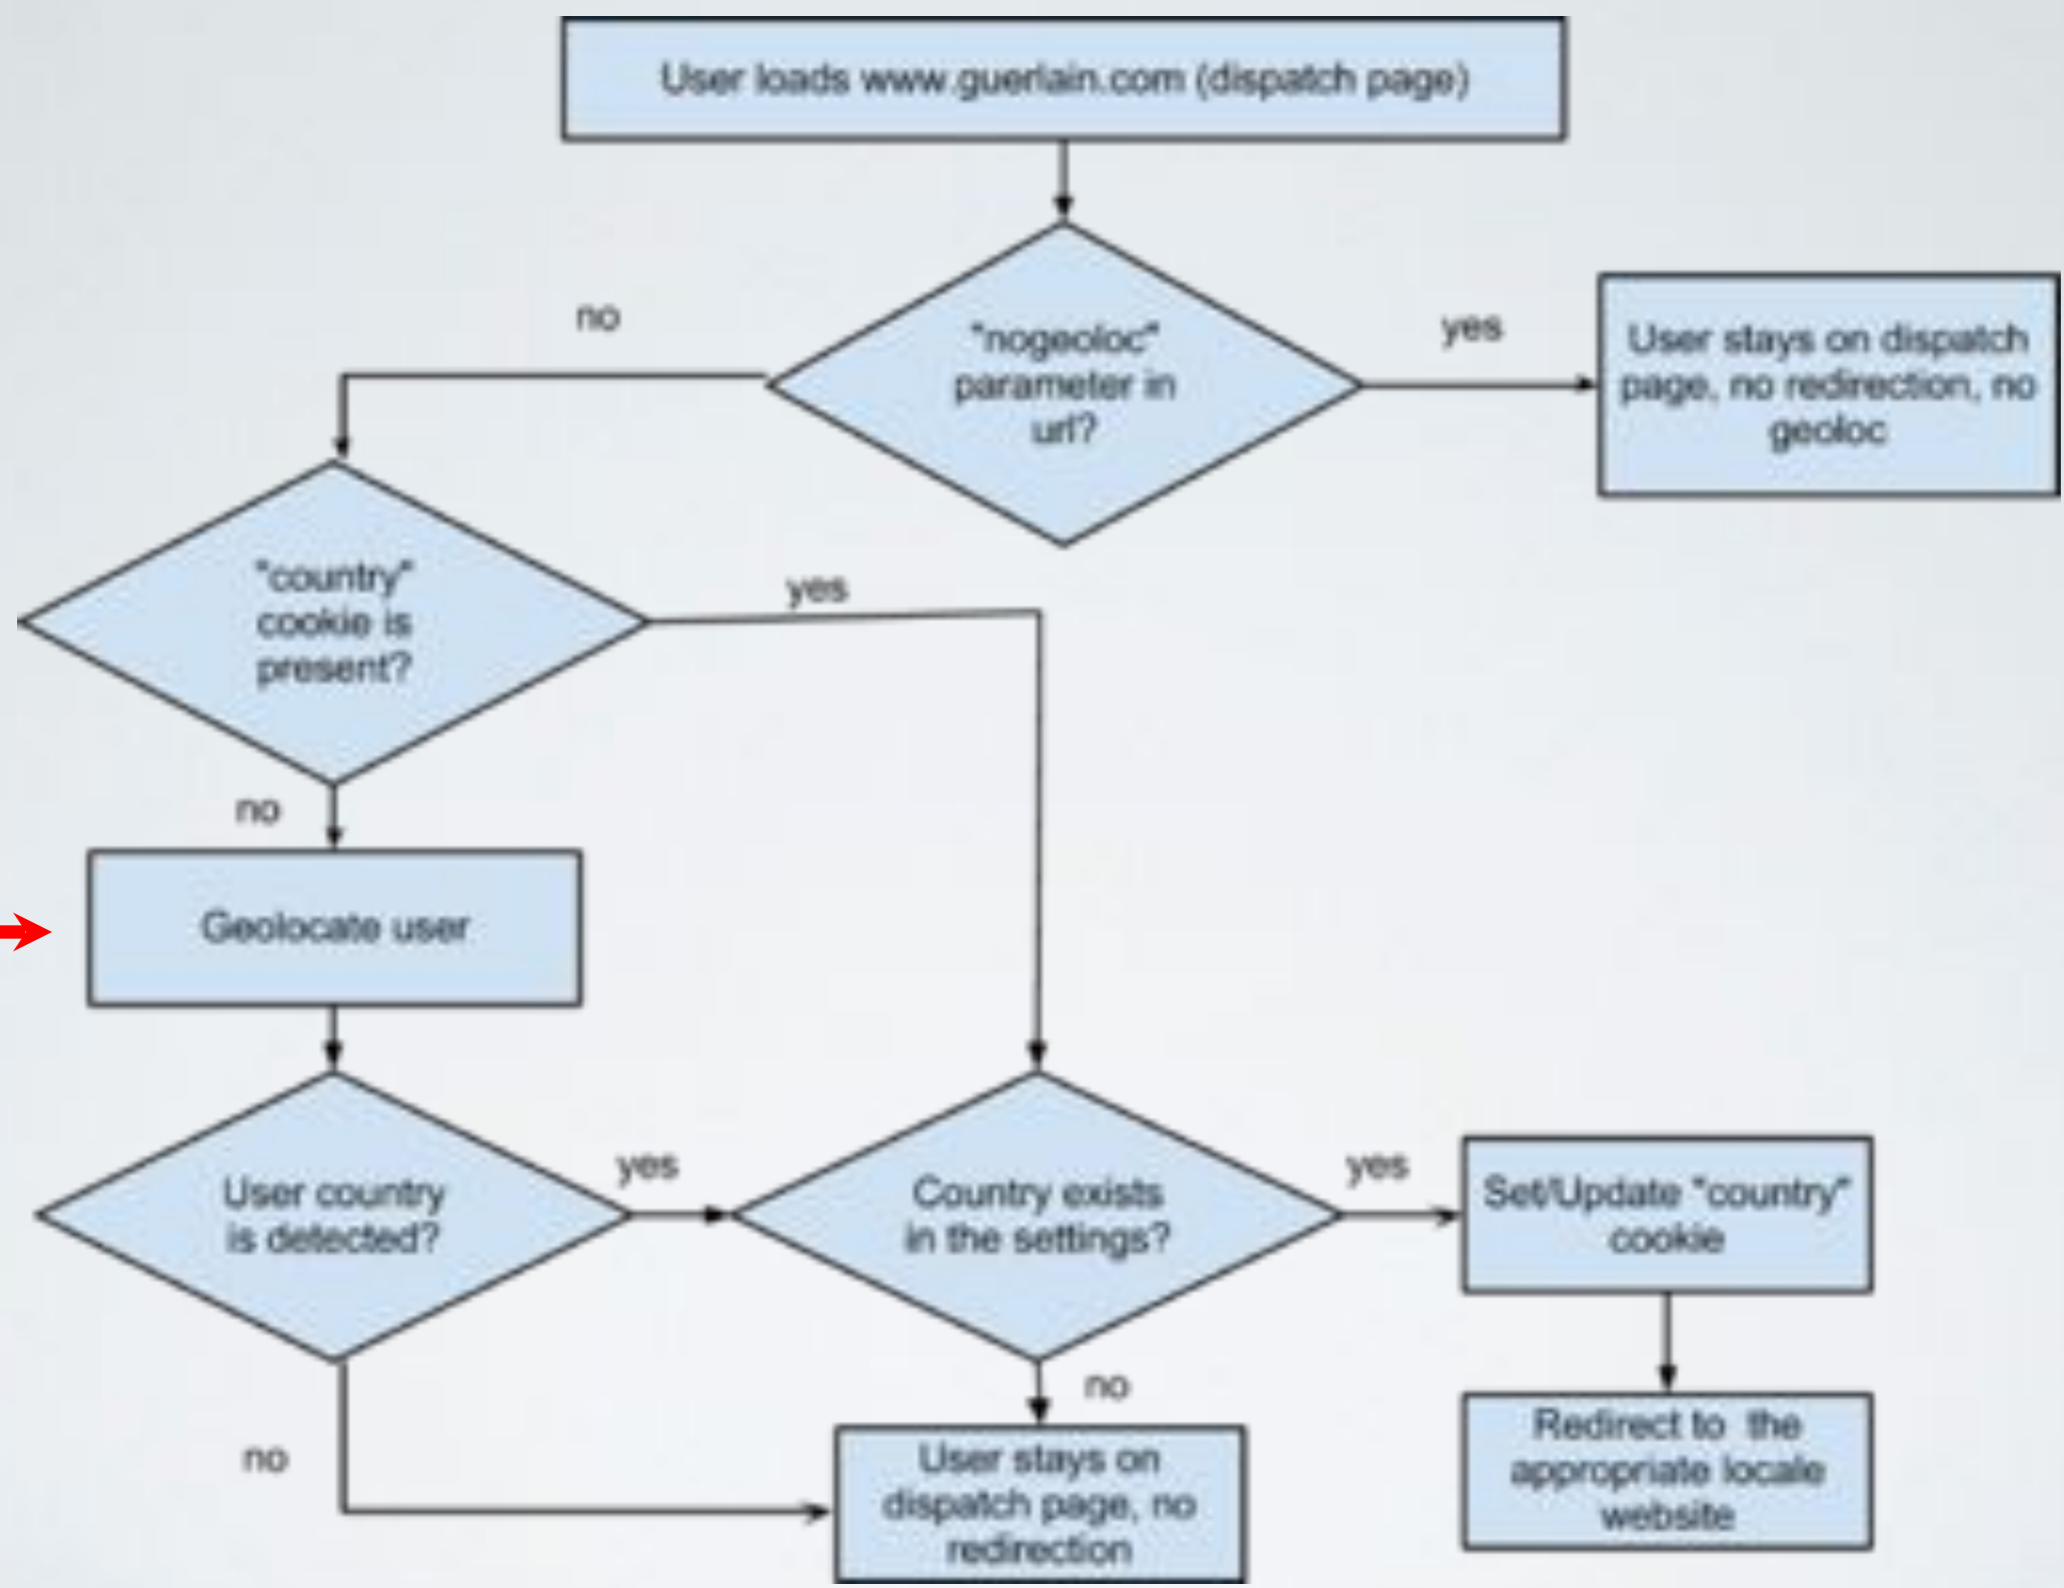

Entity translation with best source idea, but with less support - sucked. Since 2 years, we corrected several issues, had many problems with client understanding and support.

# GEOLOCALIZATION

1. If “nogeoloc” parameter present in URL on the dispatch page, geolocation and automatic redirect won't happen. User will stay on the dispatch page.
2. Otherwise script will check for the value of the “country” cookie, and if it exists - will verify if this country is present in the setting file to run redirect.
3. If “country” cookie was not found - script will try to geolocate user. If geolocated country is available present in “domains” section of settings - country cookie will be populated or updated with geolocated country and user will be redirected to the appropriate local site. If geolocated country isn't present in settings - user will stay in the dispatch page.

IMPORT / EXPORT of content

We tried many formats to support XLS, one that works with common PHP libs in most of cases is :

The Excel 97 - Excel 2003 Binary file format (BIFF8)

Feeds used to import data.

# GUERLAIN

## Master file

Import Products

Info

Last Import: 2 hours ago  
1788 imported items total

Import

Import file

Imported: Product\_796\_Product\_20\_20190905.xls  
10:1:00  
Apply errors and log errors

[Change File](#) for file selection  
Select a different file from your local system

Import

2 files: catalog and products/SKUs

SKUs as well as products could have multiple photos, so we also have:

A ZIP archive with media organized into folders  
product/product-ID/xxxxxx.jpeg  
or sku/sku-ID/xxxxxx.jpeg

**Product images:** primary image list, N zoomed images, background image, images & video editorials

**SKU images:** primary, list, background, texture

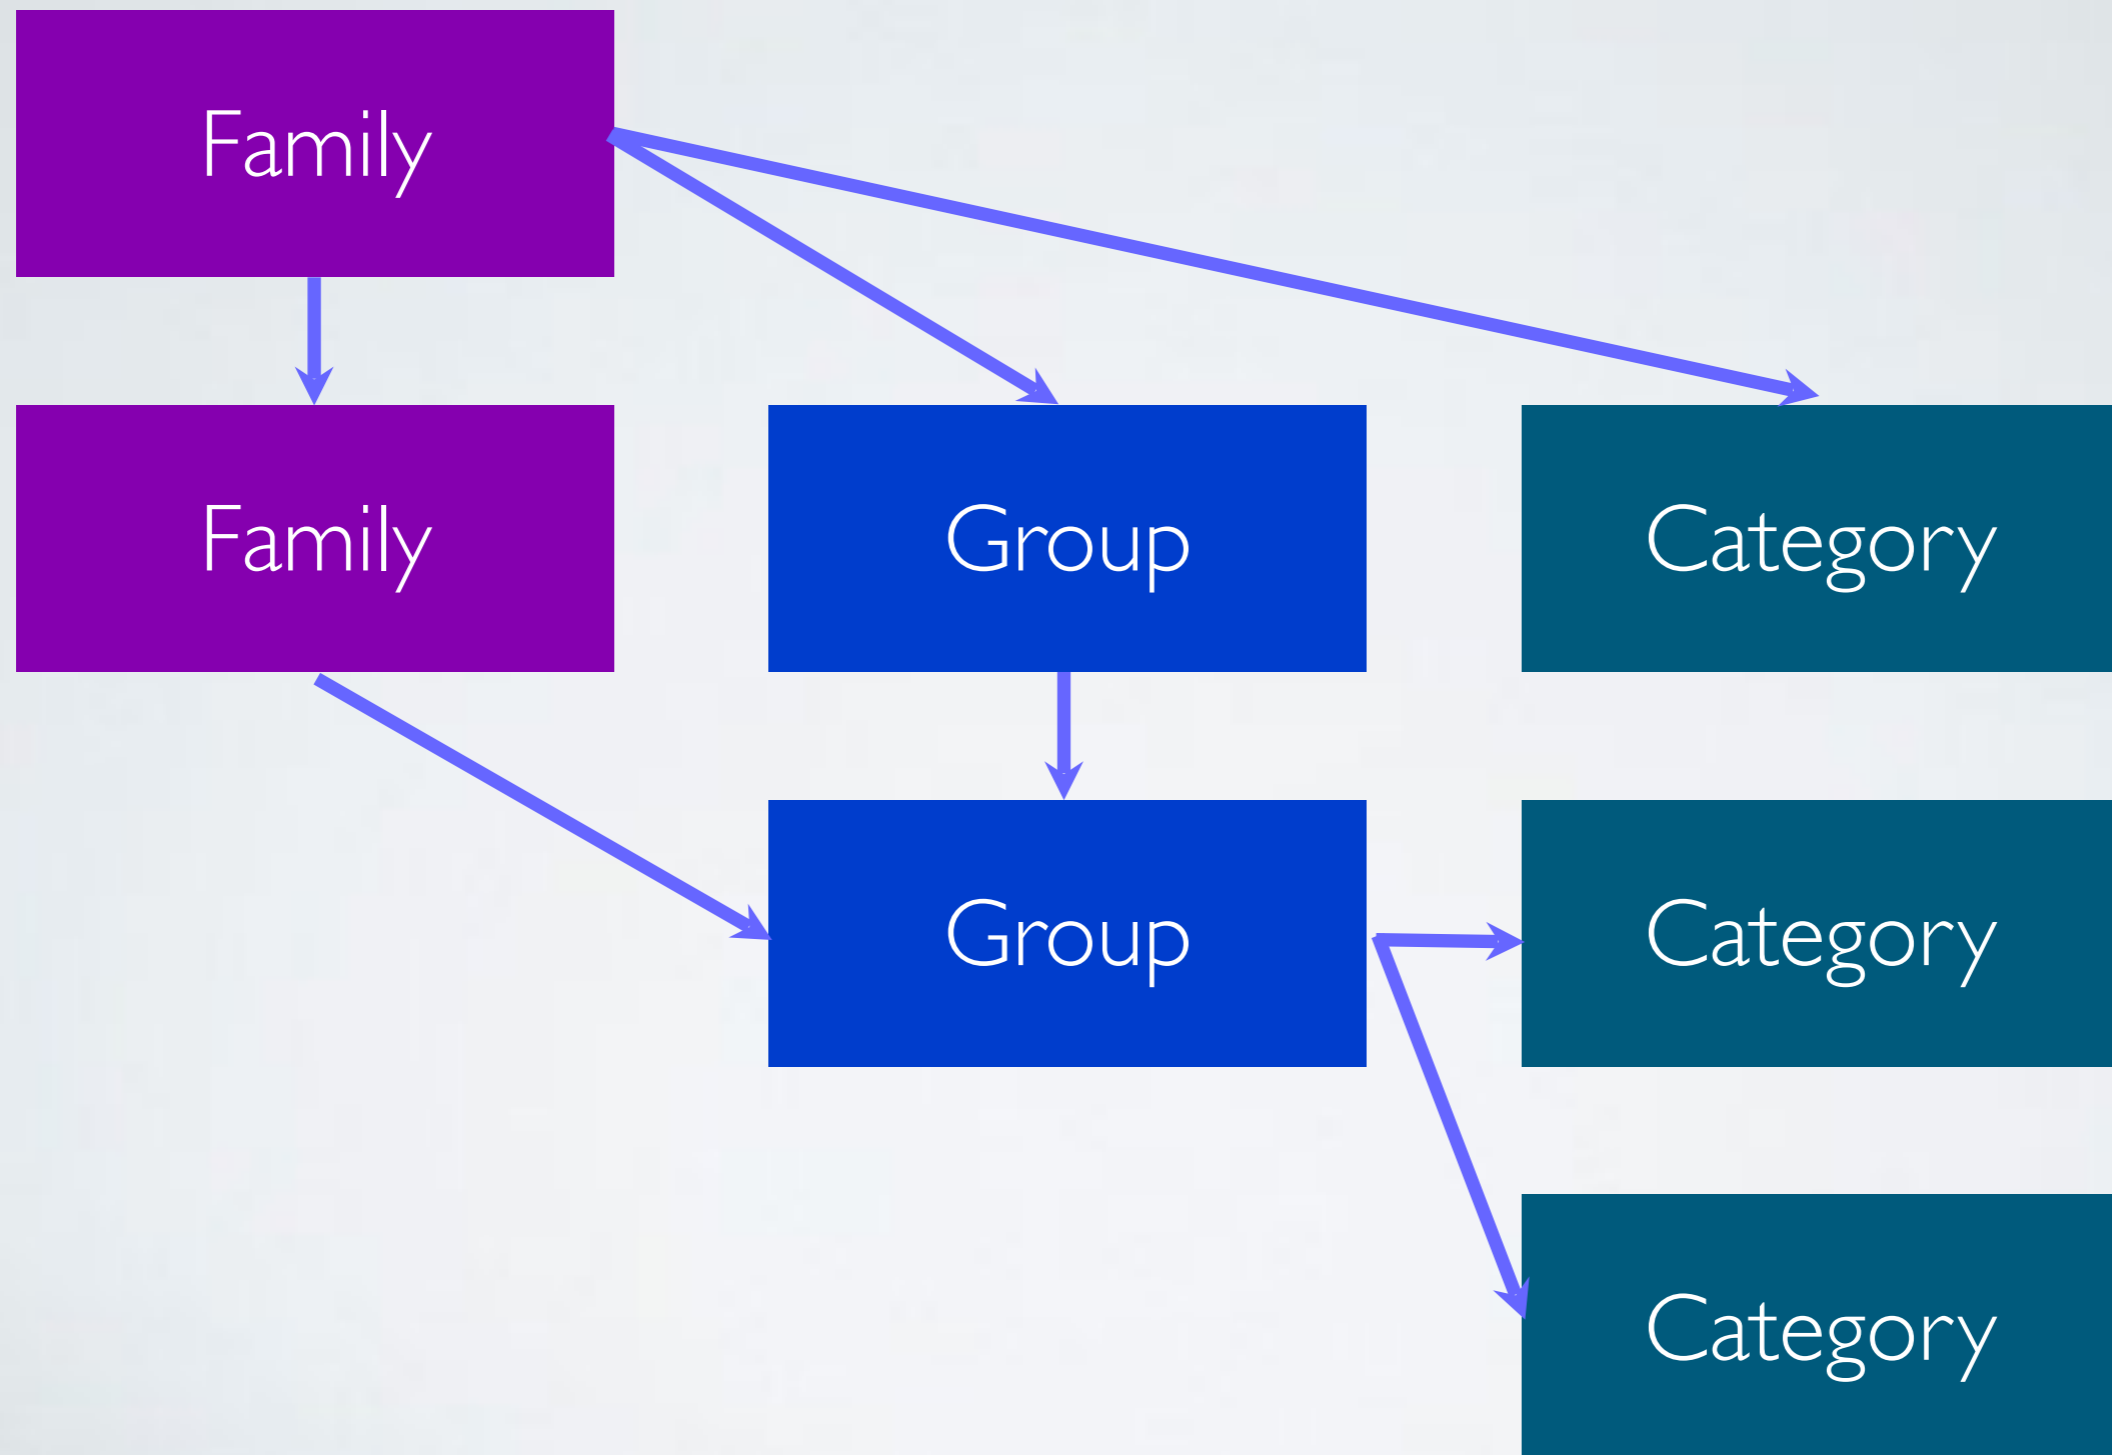

No deletion (uniquely via BO)

Import doesn't make changes

References to products still unknown

All fields (40)

# Architecture of a complex catalog

# ERP INTEGRATION

Working with **SAP** is not complicated, but **laborious**. One command can be **5000 lines** of XML

We have created a tool to send an XML command to SAP, directly from the Drupal back-office

In addition, we have put into place a log of each communication (to & from) SAP that is visible from the objects concerned (command, user, SKU)

 SOAP Client

## REQUEST ENDPOINT

DRUPAL

Secure Pages

Necessary to port the **Secure Pages Domain Access** module (securepages\_domain).

For submission + redirection of all user forms.

## Secure vs insecure / http vs https

Start development with activating all https support. Define https urls at every beginning! Do think about cross-site scripting and ajax, if urls differ. Secured cookies.

Idea: start thinking secure from the beginning of every project.

SMOOTH FRONT-END

**LA PETITE ROBE NOIRE**  
EAU DE PARFUM  
Mon Nouveau Parfum

**DESCRIPTION** FRAGRANCE SECRETS DE PARFUMIER

Je suis absolument irrésistible et totalement irrésistible. Je suis la création parfaite. Grande chic et tendrement glamour.

Ma fragrance est une broderie des plus belles notes "noires" de la parfumerie: Cerise noire, Rose noire, Patchouli, Thé noir. Mon droit de vote est le fameux mytheique "oeur inversé", revisité avec subtilité et modernité. Dans sa transparence cristalline, dégraisée du noir au rose poudré, je dévoile ma petite robe noire en ombre chinoise, prête à danser!

MEMCACHE

DRUPAL

ENTITY CACHE

VIEWS CACHE

Never underestimate performance tuning.

Start first Sprint by activating all performance related modules - memcache, entity-cache, adv-agg, Varnish/purge, etc.

Test your deliveries with all those that have been activated, measure load/server responses starting from Sprint 1, force your teams to develop in a performance-oriented way.

Idea: Ecommerce is performance-oriented development.

Did you know that cache-form is a table that grows progressively and never cleans?

Mimics cache storage, but used in another way?

Did you know that Drupal commerce locks the tables, while committing updates? Any intensive Ecommerce sites will experience hard locks in order tables?

Idea: never over-estimate Drupal way, have an eye on everything (logs, tuning, etc,) and give back to the community.
